

5G standalone installation in Weissach

5G standalone in 3.5 GHz frequency band

Low latency of 10 milliseconds

One of the fastest 5G networks in Europe

Guaranteed real-time capability

2 mobile radio stations and several antennas supply the EZW

Small real-time data centers (**Multi Access Edge Computing = MEC**) close to mobile communication masts also ensure **security and speed in data transmission.**

» 5G in Weissach enables:

Testing new technologies at an early stage

Testing for use in vehicles

Access also for employees and visitors

» „With 5G standalone, we are bringing Europe’s fastest network to Weissach and thus new digital services in future automobiles.“

Hannes Ametsreiter,
CEO Vodafone Deutschland

» „The infrastructure expansion is an important step towards the future for us, because networking and digitization will shape the vehicle of tomorrow, both in terms of development and later operation on the road.“

Michael Steiner,
Member of the Executive Board Research and Development Porsche AG
