

# Final Taycan development

Hot-land testing at 42 degrees Celsius

## > Taycan at the Nardò Technical Center

**24**  
hours

**3,425**  
kilometers

The speed in the heat battle on the southern Italian test site was between:

**>> 195 and 215 km/h**

## > The test track

Nardò Technical Center  
Italy

Built in **1975** | **> 150** employees | **> 700 hectares** of land

**12.6** kilometers

**20** >>

Test tracks and test equipment to test vehicles under extreme conditions

Operated since 2012 by >> **Porsche Engineering Group GmbH**

## > Porsche Taycan prototype

**800 volt**  
Technology

**> 250 km/h**  
Top speed

**> 600 PS**  
Power

**< 3.5 s**  
0 – 100 km/h

„The Taycan has completed this grueling long-distance run without any problems,” says pleased line manager Stefan Weckbach: „The result in Nardò underlines the advantages of the unique 800-volt technology and its high level of maturity. Before the Taycan comes on the market at the end of the year, we will have covered more than six million kilometers worldwide.”
