

Generation

Type 964

Build period

1988 – 1994

Vehicles produced

63,762

Engine

**Six-cylinder flat engine,
naturally aspirated or turbo charged**

Displacement

3,600 cm³

Max. power output

184 kW (250 PS) – 265 kW (360 PS)

Max. torque

310 – 520 Nm

Acceleration 0 – 100 km/h

6.6 – 4.8 s

Top speed

256 – 280 km/h

This generation's top model

911 Turbo 3.6

It was truly special...

1

A 911 premiere: the first model version of the type 964, the Carrera 4, comes with all-wheel drive.

2

The all-wheel drive had originally been designed Porsche for the high-performance 959 sports car.

3

The electronically controlled and hydraulically regulated force distribution is well ahead of its time.

4

The all-wheel system relies on sensors from the Anti-Blocking System (ABS), which is used in series production for the first time.
