**It was truly special...**

**1**

The boxer principle of the flat-six engine remains – but not its air cooling.

**2**

The newly developed water-cooled unit is an investment in the future of the 911.

**3**

The four-valve, six-cylinder engine initially generates 300 PS from 3.4 litres of displacement.

**4**

After the engine facelift, 320 PS follow from 3.6 litres, and the anniversary model even reaches 345 PS.
